

We are Salford Community Solutions

A partnership between
all the services whose
job it is to help the
people of Salford live
healthy and happy lives.

Young or old, if you live in Salford, here is our
commitment to you:

When times are good you will thrive at the heart of a **strong community** where people **know and care** for one another.

If you hit a bump in the road, you will be **guided by people you trust** to find the help you need, when you need it, **close to where you live or work**.

If times get tough, skilled professionals and experts will **work together** to **help you to get back on track** as soon as possible.

And all this will happen in a **connected and coordinated** way that means you get the support you need quickly and we can demonstrate **value for public money**.

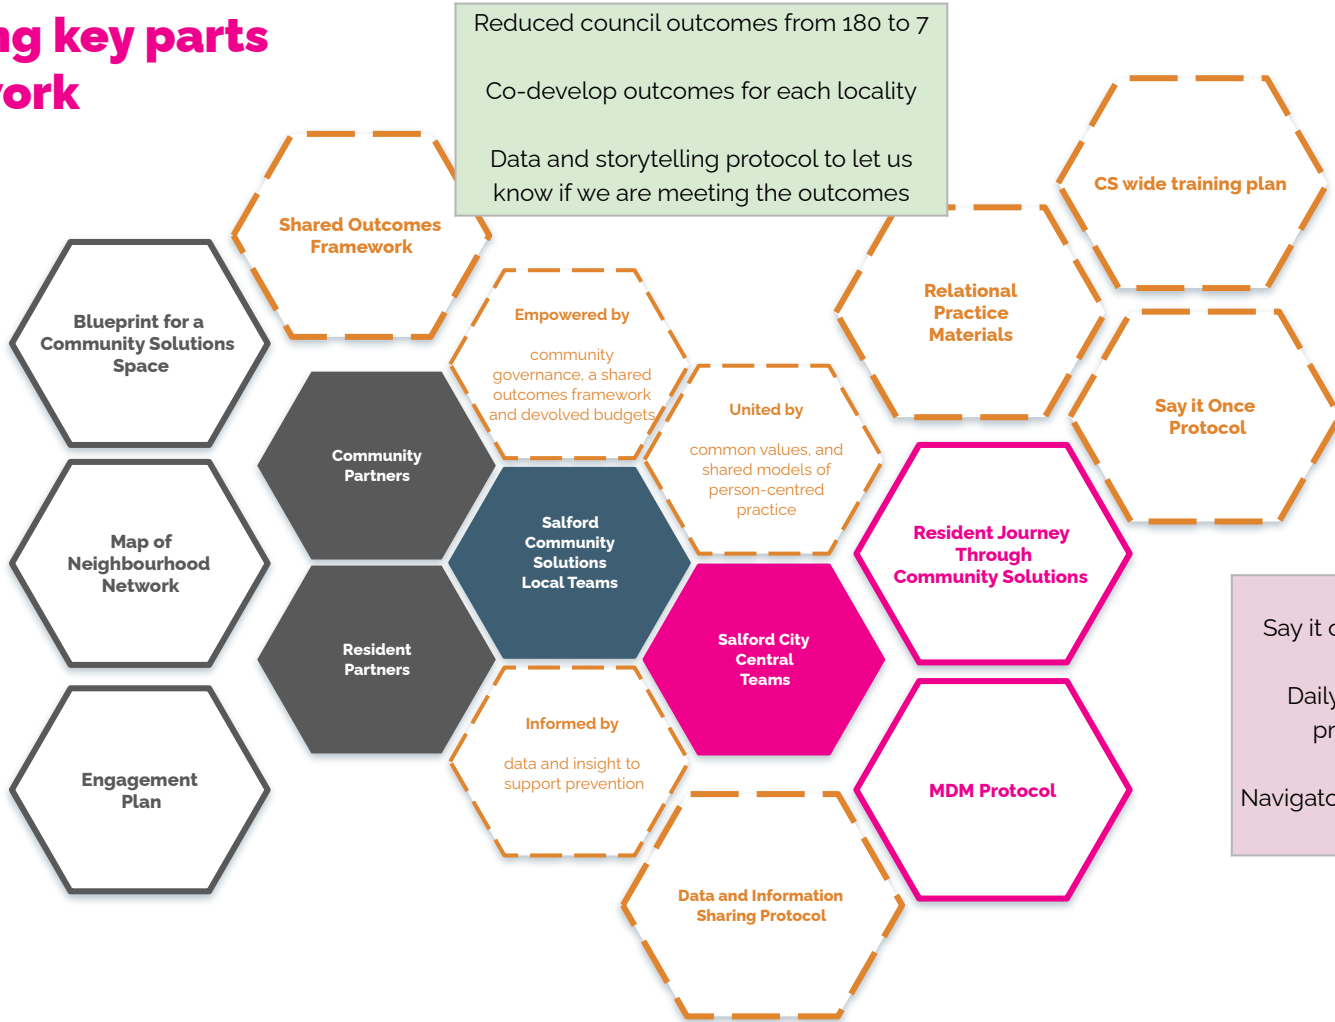

Community Solutions Framework - Core Features are built from EFH principles

Prototyping key parts of framework

Community has told us what trusted spaces looks/feels like for them - prototyping this

We need to create time and space to connect (brew, listen, privacy)

Reduced council outcomes from 180 to 7
Co-develop outcomes for each locality
Data and storytelling protocol to let us know if we are meeting the outcomes

Develop relational practice model or all CS staff + partners (in time)
Fundamental shift in culture and behaviour
Same approach everywhere

Say it once form + training
Daily MDT Meeting at preventive stage
Navigator supporting resident

Real story from our prototyping
